

**SMART Governing
IT SMART Planning and Budgeting
Steering Committee**

Mission – To establish a comprehensive information technology planning and budgeting framework that provides strategic information to the Governor and Legislative on the effective use of information technology in the state.

Vision – The State of Alabama will have a statewide planning and budgeting system that is recognized as best practices among the other states and private industry.

Goals:

1. Develop planning policies and procedures for statewide IT planning and budgeting
2. Define the components of a comprehensive statewide information technology plan
3. Define the components of an annual IT report on technology in State government
4. Develop broad IT performance indicators and capture methodologies
5. Develop IT project planning and reporting procedures

Strategies for FY08:

1. Develop Statewide FY08 IT Plan document format and summaries
2. Develop Statewide FY08 IT Plan and Project Summaries report
3. Develop IT planning and budgeting policies and recommendations
4. Develop IT sub-plan requirements for SMART Governing
5. Review templates for capture of SMART IT sub-plans
6. Establish agency IT sup-plan and project review procedures
